Black Mesa Research Facility

Office of the Administrator  
BLACK MESA RESEARCH FACILITY  
Black Mesa, New Mexico

May 5, 200-

Dr. Gordon Freeman  
Visiting Fellow  
Institute for Experimental Physics  
University of Innsbruck  
Technikerstr.25  
A-6020 Innsbruck, Austria

Re: Offer of Employment

Dear Dr. Freeman:

This letter shall confirm a recent telephone conversation in which you were offered, and did accept, a position at the Black Mesa Research Facility commencing immediately but no later than May 15. As discussed, you shall begin at Level 3 Research Associate status, assigned to the Anomalous Materials Laboratory. We understand that it will take some time to conclude your affairs at the University of Innsbruck and return to the United States. Please notify the Personnel Department of your intended arrival time immediately.

Since you are unmarried and without dependents, you have been assigned appropriate living quarters in the Personnel Dormitories. However, you may not gain

via

After a recent telephone conversation was offered, and did accept, a position at the Black Mesa Research Facility commencing no later than May 15. As discussed, you will be at Level 3 Research Associate status, working in the Explosives Materials Laboratory. We will take some time to conclude your duties at the University of Innsbruck and return to the United States. Please notify the Personnel Department of your intended arrival time immediately.

With and without dependents, you will be provided appropriate living quarters in the facility. However, you may not gain

admittance to your quarters until Level 3 security processing is complete. Please bring this offer letter and all documents listed on the attached sheet to the Black Mesa Personnel Department no later than May 15. A retinal scan will not be necessary at this time, but we do require urinalysis and bloodwork to establish baselines for your medical history during your employment.

Please note that as a necessary condition of your work with anomalous materials, you may be required to wear and operate an HEV hazardous environment suit. You will be trained and certified in its use during the standard orientation process. All further questions regarding the Black Mesa Research Facility and your role as Research Associate will be answered during orientation.

As you know, Dr. Kleiner, your former professor at the Massachusetts Institute of Technology, originally recommended you for contact by the Civilian Recruitment Division. He wishes to extend his congratulations on your decision to accept our offer. Like Dr. Kleiner, we are confident that your career with the Black Mesa Research Facility will be a long and rewarding one.

Office of the Administrator  
Civilian Recruitment Division  
Black Mesa Research Facility

# GETTING STARTED

## To Install Half-Life

Insert the game CD into your CD-ROM drive. If your CD-ROM drive has AutoPlay enabled, click the "Install Half-Life" button and follow the instructions. If AutoPlay is not enabled, double-click on the "My Computer" icon on your desktop. Double-click on the CD-ROM drive icon. Follow the installation instructions. If Half-Life does not begin installing immediately, double-click on autorun.exe.

## Minimum System Requirements

Windows® 95, Windows 98 or Windows NT  
Pentium® 133  
24 MB RAM  
2X CD-ROM drive  
Mouse and Keyboard  
640x480 SVGA high color (16-bit) display  
Windows-compatible sound device  
400 MB free hard disk space

## Recommended System Requirements

Pentium® 166+  
32 MB RAM  
3D accelerator card (OpenGL or Direct 3D)

# THE MAIN MENU

Half-Life's Main Menu can be accessed at any time during a game by hitting the Escape key. Use your mouse or the up and down arrow keys to navigate inside of the Main Menu. Hit the Escape key at any time to go to the previous screen.

Before starting a game, your Main Menu choices include:

New Game  
Hazard Course  
Configuration  
Load Game  
Multiplayer  
View Readme.txt  
Previews  
Quit

## NEW GAME

When you start a new game, you'll be asked to choose a level of difficulty.

Easy Monsters are weak and are easy to kill.

Medium Monsters are strong and are easy to kill.

Difficult Monsters are strong and are difficult to kill.

## HAZARD COURSE

Access the Hazard Course at any time during the game to perfect maneuvers like jumping and crouching, using objects, and firing weapons. The Hazard Course includes a target range as well as water and obstacle courses. A holographic guide will assist you through the course. **If you are new to action games, we highly recommend that you visit the Hazard Course before you begin a new game.**

## CONFIGURATION

Set game options, optimize video and audio settings for your system, and customize keyboard controls to your liking. After setting your configurations, hit the Done button to apply your settings and return to the Main Menu. Hit the Use Defaults button to restore the original default settings.

### Controls

The grid shown in the Controls Dialog box lists the default keyboard and mouse configuration. It also makes it easy to customize the configuration: just click on an action in the first column, press Enter, then press the key you wish to associate with that action.

# THE MAIN MENU

**Action** Describes the player action.

**Key/button** Specifies the key or mouse control associated with that action.

**Alternate** If you want to make an action accessible by more than one key or button, select an alternate in the right-hand column.

See the Controlling the Action section of this manual for a listing and description of Half-Life's default mouse and keyboard controls.

## Advanced Controls

**Crosshair** Adds a crosshair symbol to help you aim your weapons.

**Reverse mouse** Reverses the up/down (Y axis) movement of the mouse. (Push the mouse forward to look down, and pull back to look up.)

**Mouselook** Changes the mouse function from controlling your movements to controlling your ability to look around. Note that checking Mouselook disables Look spring and Look strafe.

**Look spring** Automatically "springs" your view to center screen when you begin moving.

**Look strafe** In combination with your mouse look modifier (;), this causes left-right movements of the mouse to strafe (slide you from side to side) rather than turn. It also returns your view to center screen when you begin moving.

**Joystick** Enables joystick input. For information on configuring your joystick, refer to the Readme.txt file.

**Autoaim** Automatically aims your weapon, making it easier to hit your target.

## Audio

**Game sound volume** Adjusts the volume of the game's sound effects.

**HEV suit volume** Adjusts the volume of the instructions provided by your HEV suit.

**High quality sound** If the speed of your computer is 166 Mhz or more, check this box for even richer, higher quality sound.

To hear Half-Life's music, you must have the CD in your CD drive.  
To adjust the volume of the music, go to the Start Menu/Programs/  
Accessories/Multimedia, and select the Volume Control applet.

## Video

**Video Options** Set video options such as screen size, gamma and glare reduction. Changes made to these controls will be reflected in the sample image window.

**Screen size** Controls the amount of screen space the game uses.

Reducing the screen size can often improve performance. Note that you cannot adjust the screen size if you are using an OpenGL video driver.

**Gamma** Adjusts Half-Life's color balance to best suit your monitor.

Move the slider until you can just make out the figure standing in shadow on the right side of the sample image.

**Glare reduction** Adjusts darker colors to reduce glare on your monitor.

Move the slider until you can see the camouflage pattern on the soldier's uniform.

**Video Modes** Set video modes, choose video drivers. Half-Life will check your system for the presence of OpenGL and Direct3D video drivers. It may ask you to verify the results of this check. If you have one or both drivers currently installed on your system, they will appear as choices at the top of this screen. You can also choose to run Half-Life in software mode. If you do not have these video drivers installed, Half-Life will default to software mode.

**Display mode** Half-Life evaluates your system's graphics adapter and automatically lists the display modes available for your computer.

Selecting a higher resolution mode generally results in better quality images, but can lower game performance.

**Run in a window** Check this box if you prefer to run Half-Life in a window rather than full screen.

**Use mouse** Check this box if you are using the mouse to play Half-Life.

Leaving the box un-checked will allow you to use the mouse outside the game window.

# THE MAIN MENU

**Content Control** Turn off visuals inappropriate for younger players. This is a password-protected feature, designed to let parents control the level of violence. You will need to re-enter your password to turn the effects on again.

**Updates** Receive updates of the latest Half-Life code, including new hardware drivers and bug fixes, if necessary. You will be able to see if a new update is available before you connect.

## LOAD GAME

Select and start a previously saved game.

## MULTIPLAYER

Join a multiplayer game on the Internet, chat with other Half-Life players, set up your own LAN, or customize your player character. For more information about Multiplayer options, see page 22.

## VIEW README.TXT

Half-Life's Readme file contains basic information on system performance, product features, and troubleshooting. We recommend that you read it before playing.

## PREVIEWS

Get information about Half-Life: Team Fortress and other up-coming Sierra Studios releases.

## QUIT

Exit Half-Life. Don't forget to save your game.

If Half-Life is already running, your Main Menu choices will also include:

### Resume Game

If you are in the middle of playing Half-Life when you enter the Main Menu, use the Resume Game menu item to return to the action.

### Save/Load Game

Save your game or load a previously saved game. You may also save your game quickly from within Half-Life by pressing Quicksave (F6). Load this game by pressing Quickload (F7). Only your most recent Quick-saved game can be selected from the Save/Load menu.

# CONTROLLING THE ACTION

You may want to charge into a room and start shooting everything in sight. Sometimes we do, too. But in Half-Life, there are many other ways to interact with your surroundings. Half-Life's environments are as realistic as possible, and this level of realism will affect the way you move around. For instance, there's gravity – if you stand on ceiling tiles, don't be surprised if they collapse under your weight. There are also multiple surface effects – yes, wet floors really are slippery. And, if hit hard enough, glass will break. You can also shoot bullet holes onto walls to mark your turf, or leave yourself location reminders.

Try experimenting with your environment. Use your wits as well as your weapons to outsmart opponents and navigate through tough spots.

## Use Key

Firing weapons is just one of things you can do in Half-Life. Use your Use (E) key for all sorts of other activities.

**People** Not everyone you meet is your enemy. You will encounter scientists and security guards who can provide cover fire, open locked doors or improve your health. Approach these characters and hit the Use key to get them to assist you. Hit the Use key again to leave them behind.

**Objects** Many objects, including doors, switches, and buttons, can be activated by hitting the Use key. In some cases, you'll need to hold down the Use key to perform the desired action.

**Power ups** Activate HEV suit chargers and wall-mounted first aid kits by stepping up to them and holding down the Use key.

**Pulling** Pull boxes and carts into new positions by holding down the Use key and walking slowly backwards. (To push a moveable object, just walk up to it, then continue walking slowly.)

RETRACTED

# CONTROLLING THE ACTION

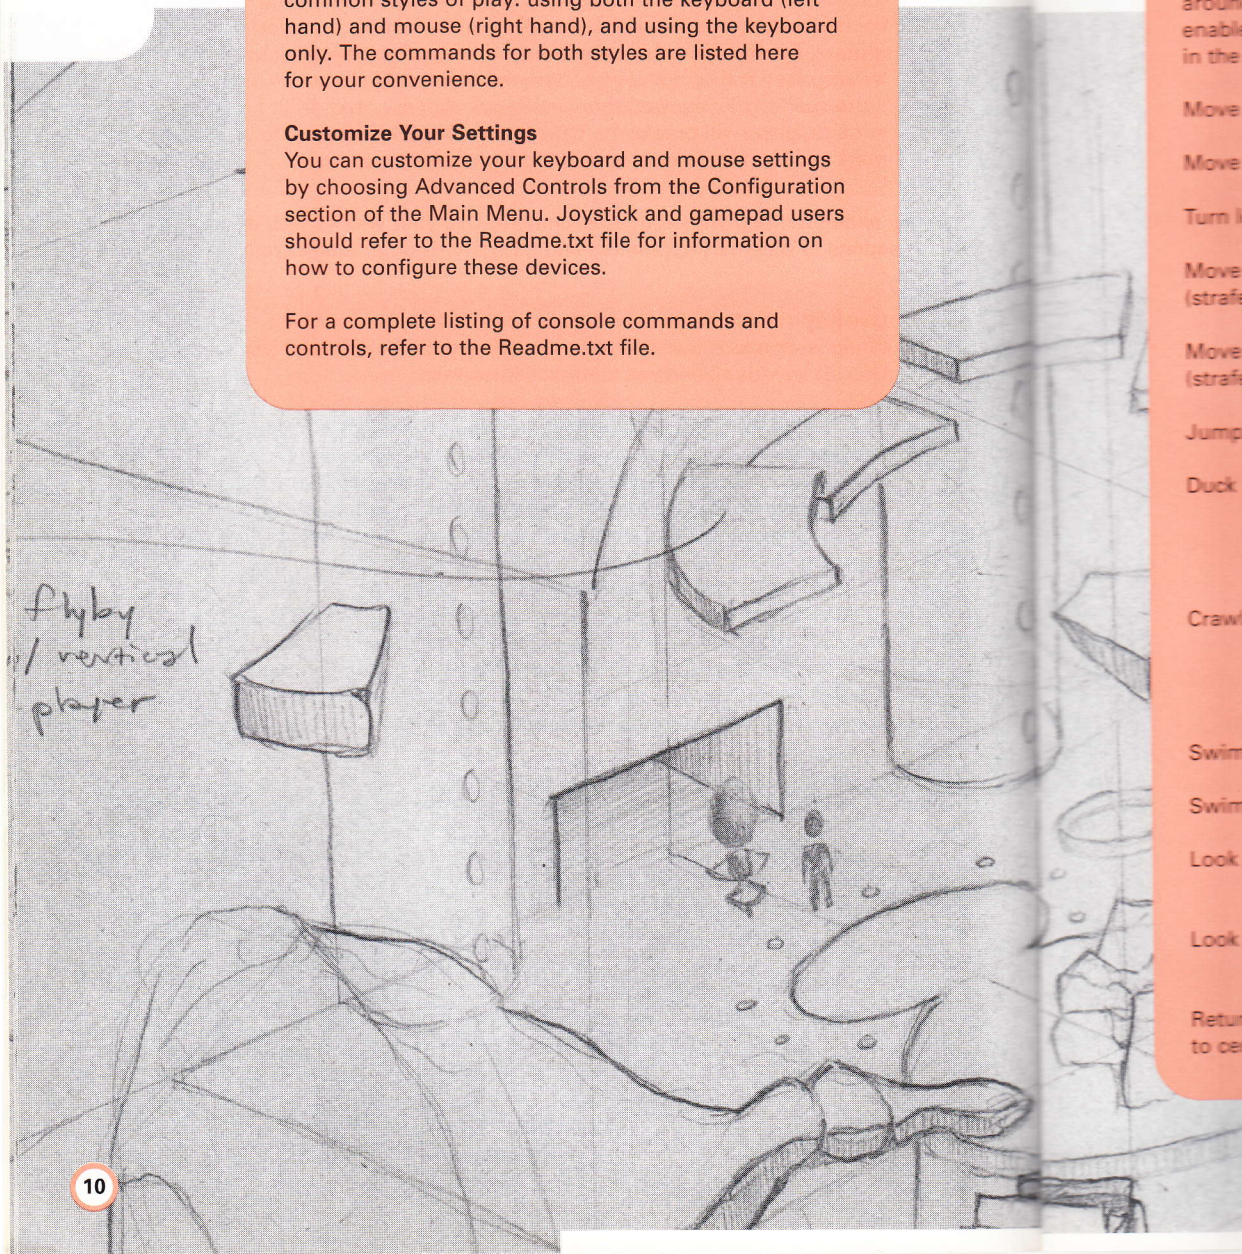

## Configurations

Half-Life's default configuration accommodates two common styles of play: using both the keyboard (left hand) and mouse (right hand), and using the keyboard only. The commands for both styles are listed here for your convenience.

## Customize Your Settings

You can customize your keyboard and mouse settings by choosing Advanced Controls from the Configuration section of the Main Menu. Joystick and gamepad users should refer to the Readme.txt file for information on how to configure these devices.

For a complete listing of console commands and controls, refer to the Readme.txt file.

## KEYBOARD / MOUSE CONFIGURATION

With this configuration, you'll use the mouse to control your ability to look around (up, down, left and right) rather than to control your movements. To enable this function, check the "Mouselook" box under Advanced Controls in the Configuration menu.

Move forward     **W**

Move backward     **S**

Turn left/right     **Mouse**     Move your mouse left and right to turn.

Move left  
(strafe)     **A**     Strafing is ideal for side stepping enemy gunfire.

Move right  
(strafe)     **D**

Jump     **Space Bar**

Duck     **Control**     Ducking can be used in coordination with other actions, such as jumping or running. Release the control key to return to standing.

Crawl     **Control + W**     Crawling makes less noise than walking or running, which can be particularly helpful when trying to sneak past a noise-sensitive enemy.

Swim up     **V**

Swim down     **C**

Look up     **Mouse**     Move the mouse forward to look up.

Look down     **Mouse**     Move the mouse backward to look down.

Return vision  
to center     **End**

# ON-SCREEN INFORMATION

## YOUR HEV SUIT

Early in the game, you must find and put on your Hazardous Environment (HEV) Suit. The suit needs to be recharged periodically--the greater the charge, the more protective power your suit has. To recharge your suit, seek out a wall-mounted HEV suit charger, or pick up batteries along the way.

## THE HUD

Once you are in your HEV suit, the suit's heads up display (HUD) is activated. The HUD is an on-going barometer of health, available energy, and remaining ammo. The HUD allows you to survey and select from your weapons arsenal and inventory items. It also alerts you when you are sustaining environmental damage.

Your health

current clip

Total available  
ammo

Secondary  
ammo, if  
available

# ON-SCREEN INFORMATION

To fire using primary ammo, hit the Primary Attack (**Mouse 1** or **Enter**) key. To fire with your secondary ammo, hit the Secondary Attack (**Mouse 2** or **\**) key. To reload your weapon, hit the Reload (**R**) key.

## Weapons Selection

Weapons fall into 5 general categories:

Low-tech (the crowbar)

Hand guns

Machine and shotguns  
(shown expanded)

High-energy experimental weapons

Weapons that can be tossed or placed

As you discover weapons in Half-Life, they automatically get added to their proper categories, corresponding to keys 1-5 on your keyboard.

You can switch weapons one of three ways:

1. Toggle through all your available weapons by repeatedly hitting the Next Weapon or Previous Weapon ( **] or [** ) keys. Hit the Enter key to select the highlighted weapon.
2. Jump directly to a specific weapon by hitting the number key that corresponds to the weapon's category. Then, counting down the column, hit the same category number again as many times as needed to match the position of the desired weapon. Hit the Primary Attack key (**Mouse 1** or **Enter**) to begin using that weapon.
3. Customize your keyboard. (See Advanced Controls for customization information.)

#### Inventory

**Flashlight** Standard issue with your protective suit. It must be selected manually when you want to use it by hitting the Toggle Flashlight (**F**) key. It draws energy, so don't forget to turn it off when you exit a dark area. The flashlight will recharge itself automatically.

**Long Jump** You must first acquire a Long Jump Module in order to perform a long jump. Each long jump draws energy; you must wait for a recharge in order to perform another long jump. To perform a long jump, you will need to be moving forward, then duck and quickly hit the Jump (**Space Bar**) key.

#### Danger Monitors

Your HUD has visual and audio alarms to warn you when the environment is threatening your health. If you see any of the following symbols, act fast:

Poisonous biohazard

Burning

Radiation

Freezing

Acid or corrosive chemicals

Electric shock

Drowning

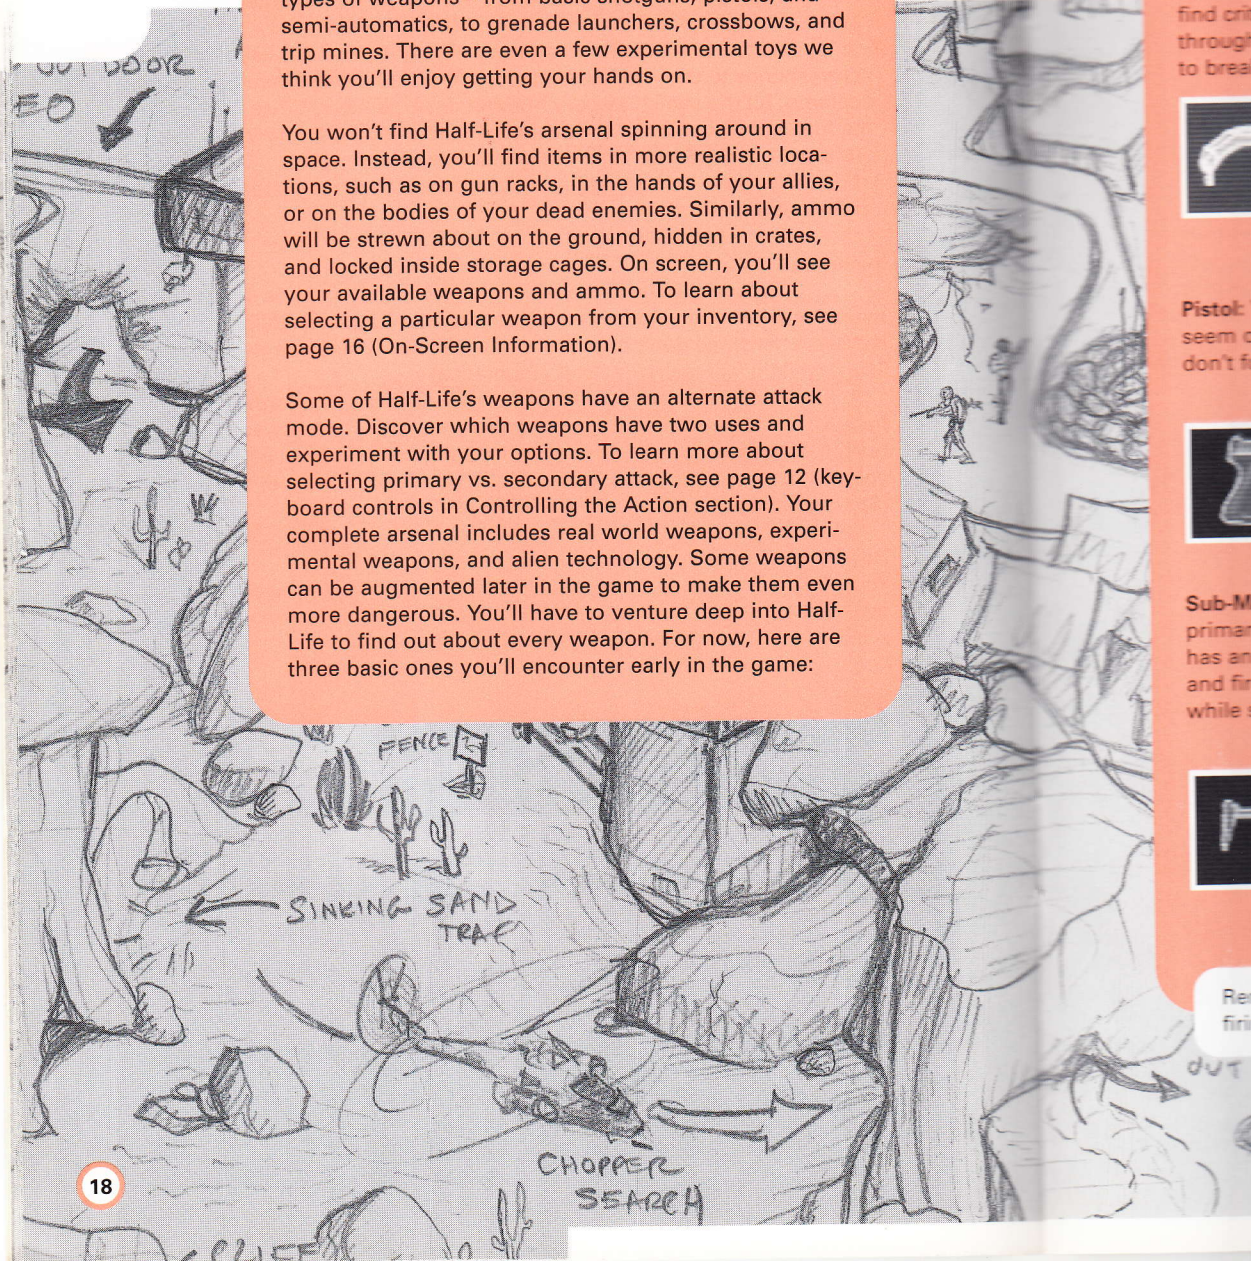

# WEAPONS

If you like big guns and other destructive devices, you've come to the right place. Half-Life has many different types of weapons – from basic shotguns, pistols, and semi-automatics, to grenade launchers, crossbows, and trip mines. There are even a few experimental toys we think you'll enjoy getting your hands on.

You won't find Half-Life's arsenal spinning around in space. Instead, you'll find items in more realistic locations, such as on gun racks, in the hands of your allies, or on the bodies of your dead enemies. Similarly, ammo will be strewn about on the ground, hidden in crates, and locked inside storage cages. On screen, you'll see your available weapons and ammo. To learn about selecting a particular weapon from your inventory, see page 16 (On-Screen Information).

Some of Half-Life's weapons have an alternate attack mode. Discover which weapons have two uses and experiment with your options. To learn more about selecting primary vs. secondary attack, see page 12 (keyboard controls in Controlling the Action section). Your complete arsenal includes real world weapons, experimental weapons, and alien technology. Some weapons can be augmented later in the game to make them even more dangerous. You'll have to venture deep into Half-Life to find out about every weapon. For now, here are three basic ones you'll encounter early in the game:

Crowbar  
in hand  
opened  
find cr  
through  
to break

Pistol: Y  
seem o  
don't fo

Sub-M  
primar  
has an  
and fi  
while s

Rem  
firin

**Crowbar:** Half-Life is a complicated place where a crowbar can really come in handy. Things like barrels, boxes, gears, and grates can be pried open, smashed, or otherwise wrenched loose with the crowbar. You'll find critical paths that have been blocked or sealed shut. You can dig through such obstacles with your crowbar. You can also use your crowbar to break glass and bludgeon approaching enemies.

**Pistol:** You acquire this 9mm pistol early in the game. Although it may seem outdated as you acquire more technologically advanced weapons, don't forget about it: it's one of the few weapons that fires under water.

**Sub-Machine gun:** This is one of the first weapons you'll acquire with both primary and secondary attack options. The Navy Seal sub-machine gun has an attached grenade launcher (secondary attack). It has infinite range and fires rapidly. Its primary attack fires 30-round clips of 9mm bullets, while secondary attack launches grenades.

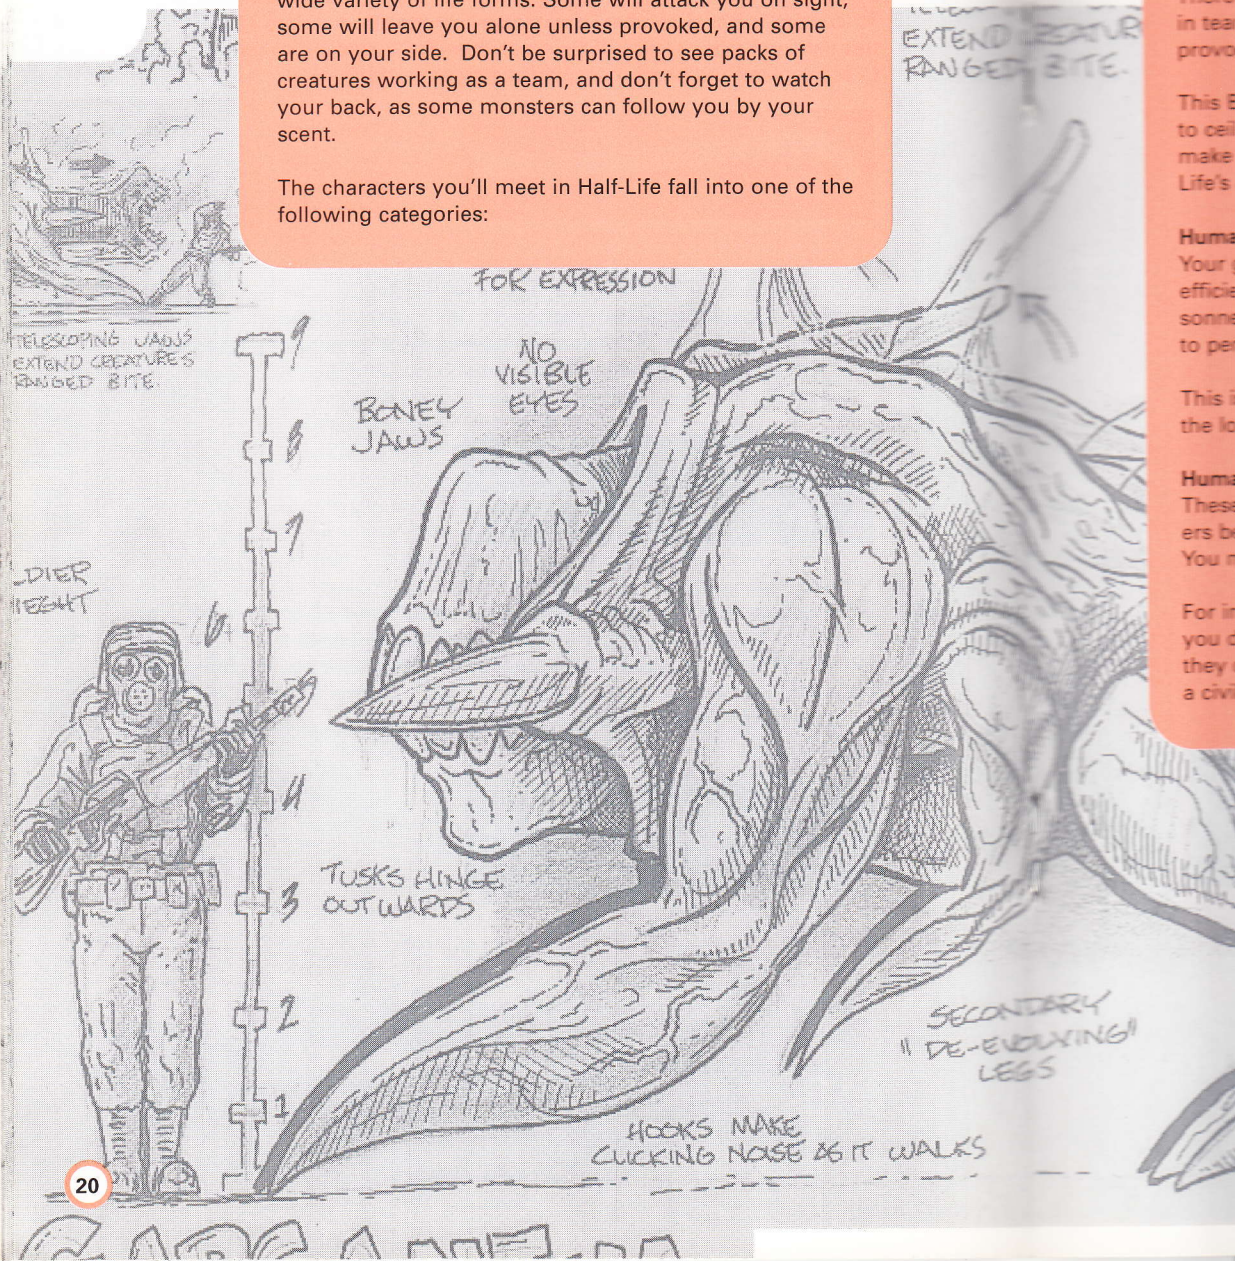

Remember, you can practice using your crowbar and firing the sub-machine gun in Half-Life's Hazard Course.

# ENEMIES AND OTHER CHARACTERS

After your experiment with the portal goes awry, the Black Mesa Research Facility will be populated with a wide variety of life forms. Some will attack you on sight, some will leave you alone unless provoked, and some are on your side. Don't be surprised to see packs of creatures working as a team, and don't forget to watch your back, as some monsters can follow you by your scent.

The characters you'll meet in Half-Life fall into one of the following categories:

Alien  
There  
in te  
prov

This B  
to cell  
make  
Life's

Huma  
Your  
efficie  
sonne  
to per

This i  
the lo

Huma  
These  
ers b  
You n

For in  
you d  
they  
a ci

### **Alien Enemies**

There are over a dozen different species. Some work in teams, others are loners. Some will attack without provocation, others would rather avoid conflict.

This Barnacle is a stationary monster that attaches itself to ceilings and lies in wait. His passive approach doesn't make him any less deadly. Of course, plenty of Half-Life's alien enemies are quite mobile. You'll see.

### **Human Enemies**

Your government has sent in a dangerous and very efficient clean-up crew. Unfortunately, these military personnel don't only want to obliterate aliens, they're trying to permanently silence you and your co-workers, too.

This is just one of several different militia types. Be on the lookout for soldiers and trained assassins.

### **Human Civilians**

These scientists and security guards were your co-workers before the accident, and can be valuable allies now. You may be able to enlist them to help you.

For instance, security guards have access to rooms that you don't. Get them to follow you when needed, and they can unlock doors for you. Hit the Use key (E) to get a civilian to help you. Hit Use again to leave him behind.

# MULTIPLAYER

Half-Life's multiplayer features eliminate the hassle of getting connected to the game of your choice. Whether you're new to multiplayer games or a seasoned veteran, you'll appreciate how fast and easy it is to get into the action.

Note: For best results, connect to the Internet before selecting a multiplayer game.

Half-Life's multiplayer selections include:

**Quickstart**  
**Internet games**  
**Chat rooms**  
**LAN Game**  
**Customize**  
**Visit WON**  
**Exit**

## QUICKSTART

Select Quickstart to get online and playing as fast as possible. Once you've logged on to our system, it will automatically check the list of current games and drop you into the best available game.

## INTERNET GAMES

Use this feature if you prefer to browse the list of available games. The list reports the speed of the network, which multiplayer map is being played, the game being played (the list will eventually include Half-Life: Team Fortress and Half-Life expansion packs), and the current number of players/maximum number of players allowed in the game.

**Connect** To join a game, click on the game name, then click on Connect.

**Create game** Host a new game on your computer.

**View game info** Check players' names and scores, and review the rules chosen for your game.

**Refresh** Get the latest information on the current list of games.

**Update** Request a new listing of available games.

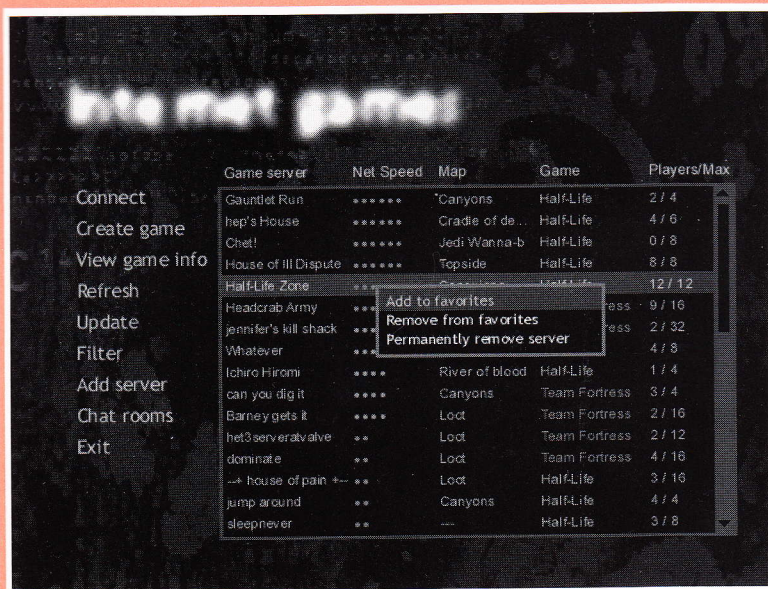

**Filter** Look at a subset of available games.

**Add server** Add a specific game to the list by manually entering its Internet address.

**Chat rooms** Visit the Chat rooms to hook up with other players.

**Exit** Go back to the main multiplayer menu.

In addition to the choices listed on the screen, you can further manage your list of games by selecting a specific game, then right-clicking your mouse. If you select "add to favorites," an icon will appear next to the game name. Favorites are always shown on your list, even if they are not currently available.

# MULTIPLAYER

## CHAT ROOMS

Chat rooms are a great place to meet friends, taunt opponents or discuss strategy. To make getting started easy, a chat room will be selected for you automatically. Join in the discussion or switch to a different room by selecting List rooms. You can also search for a specific player or room name by clicking the Find button. If you enter the name of a private chat room, you will be asked for a password before you can join the room.

## LAN GAME

You can also play multiplayer Half-Life on a LAN (Local Area Network). If you choose LAN game from the menu, Half-Life will automatically check your LAN for active games. You can join a current game, refresh the list of games, create a new game, or add a specific game to the list by manually entering the Internet address.

## CUSTOMIZE

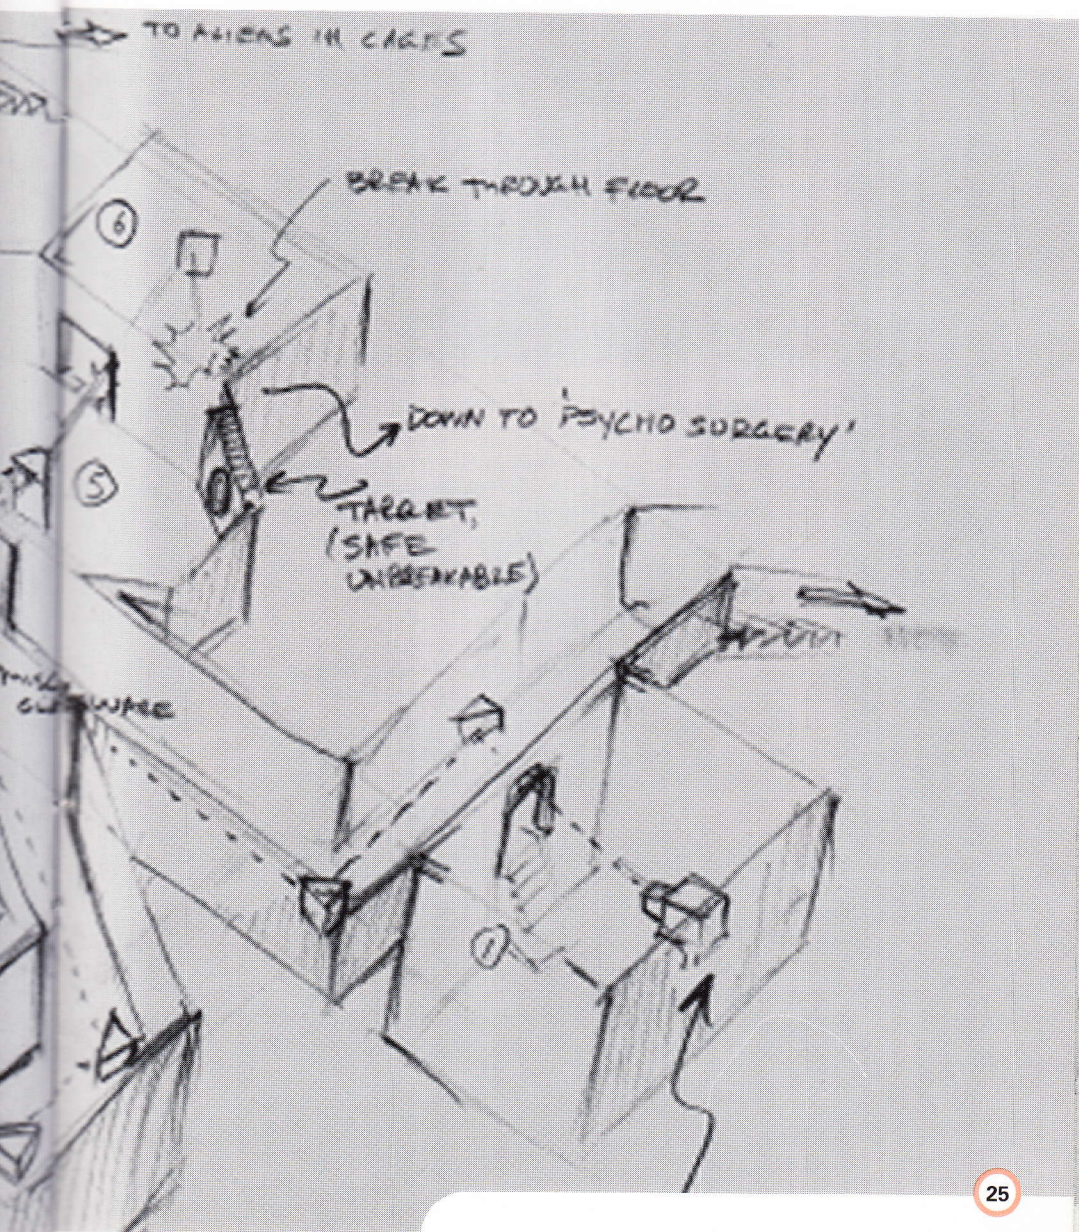

Half-Life gives you the ability to customize the appearance of your character in multiplayer games. Select from a list of options for player face, model and skin, or import your own artwork for a truly unique look. Please refer to the Readme.txt file for details on how to create your custom artwork and import it in to Half-Life.

You can also select a "spray paint" image that can be used to mark your territory or announce your clan affiliation. Use the **T** key to apply your image to walls and other surfaces. Refer to the Readme.txt for information about creating custom spray paint images.

## VISIT WON

Connect to the WON website to get the latest news on multiplayer Half-Life. You'll also find tips and strategy guides, contests, mod and skin libraries, and links to Half-Life fan sites.

# WORLDCRAFT 2.0

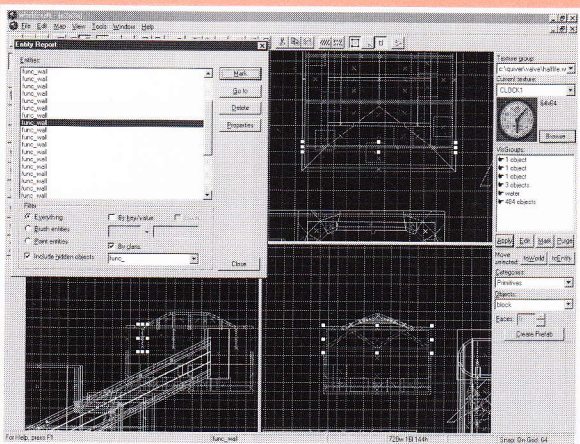

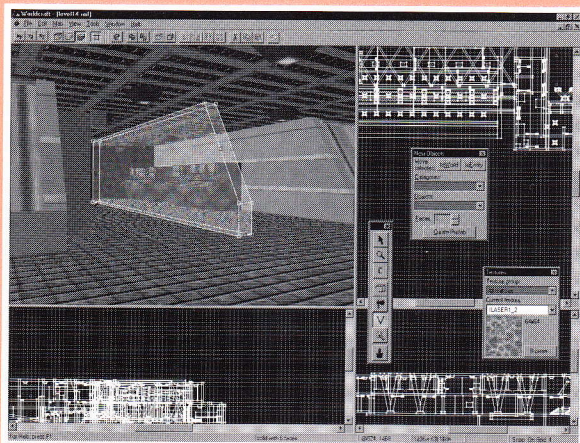

So you've finished Half-Life with all your limbs intact, but you're still hungry for more? Dive into Worldcraft 2.0 (included on your Half-Life disc) and create your own custom-built Half-Life levels. Worldcraft is the most popular and powerful level editor around. Its intuitive interface helps you build your own extraordinary worlds, and you won't need a degree in Computer Science to do it. We used Worldcraft 2.0 to build all of Half-Life's levels.

With Worldcraft, you use a set of basic shapes to get started. Combine, carve, and otherwise customize these shapes to create the architecture you want. You decide what's possible in your new level, including pathways, obstacles, machinery, furniture, and more. Add some lighting. Then populate your level with friends and enemies. Use the Half-Life PreFab factory to make building your level even simpler. Whether you want to create a replica of your garage or a fantastic alien world, you can do it with Worldcraft 2.0.

To give Worldcraft a try, select wc20full.exe from the root directory. Once Worldcraft is installed, refer to Online Help. There, you'll find an Overview of level editing using Worldcraft 2.0, a detailed Reference section, and a step-by-step Tutorial that will have you building your own level in minutes.

There is no technical support offered for Worldcraft 2.0. However, there are several excellent Worldcraft resources on the Internet. Get started at <http://www.planetquake.com/worldcraft> or <http://www.contaminated.net/wavelength/>

# TECHNICAL ASSISTANCE

## Automated Technical Support Line, North America: (425) 644 4343

Sierra On-Line offers a 24-hour Automated Technical Support line with recorded answers to the most frequently asked questions. To access this service, call (425) 644 4343, and follow the recorded instructions to find your specific topic and resolve the issue. If this fails to solve your problem, you may still write or fax us with your questions, or contact us via our Web site (<http://www.sierra.com>).

## North America Technical Support

#### THE SIERRA NO-RISK GUARANTEE

The Promise: We want you to be happy with every Sierra product you purchase from us. Period. If for any reason you're unhappy with the Program, return it within 90 days of your purchase for an exchange or a full refund.

The Only Catch: You've got to tell us why you don't like the Program. Otherwise, we'll never get any better. Send the Program back to us within 90 days of your purchase, postage prepaid, along with your original, dated sales receipt and we promise we'll make things right.
